Kolkata, West Bengal

PROFILE

Skilled in multiple programming languages, know how to work with databases and can develop responsive websites with fully functioning backends. Have participated in several hackathons including SIH 2025 and have cleared the college internal round.

PROJECTS

Tattva - Hydrogen Predictor
https://tattva-f5ws.onrender.com/

- Developed and deployed 'Tattva - Hydrogen Predictor,' a full-stack web application to simulate green hydrogen production and estimate cost metrics.
- Engineered dynamic UI that accepts key inputs (Solar/Wind capacity, Electrolyzer efficiency) to drive predictive model calculations.
- Integrated an interactive AI Assistant for user support on project feasibility, methodology, and emissions analysis.
- Managed end-to-end application lifecycle, including front-end, backend inte

Weather App
https://huggingface.co/spaces/AlternativeDev101/WeatherApp

- Created and deployed a Weather Prediction App on Hugging Face Spaces, allowing users to query and visualize current weather conditions for any location.
- Utilized Gradio and Python to rapidly prototype and launch the interactive web interface, demonstrating proficiency in ML/AI deployment environments.
- Integrated external weather APIs to fetch real-time data, showcasing capability in service integration and data handling.

EDUCATION

2024-2028
B.P. PODDAR INSTITUTE OF MANAGEMENT AND TECHNOLOGY
1st Year YGPA: 9.66

2009-2024
METHODIST SCHOOL, DANKUNI (ICSE/ISC)
XII: 93.75%
X: 89.4%

PROGRAMMING LANGUAGES

C, Python, Java

LIBRARIES/ FRAMEWORKS

NumPy, Matplotlib, Pandas, Flask, FireBase, ReportLab

DATABASES

Postgre SQL

CERTIFICATIONS

- Linked Lists with C (Udemy)
- Learn Pandas (Kaggle)

LANGUAGES

- English
- Bengali
- Hindi
